### AD FOR THE MAIN SURVEY STUDY

**Study title:** Further Development and Validation of the Cerebellar Neuropsychiatric Rating Scale (CNRS)

**Research group:** The Schmahmann Laboratory/Massachusetts General Hospital Ataxia Center, Boston MA, USA

We are conducting research to further validate our new scale for detecting emotional issues related to the Cerebellar Cognitive and Affective Syndrome (CCAS).

We are currently recruiting the following individuals, who are English speaking, to take part in an online questionnaire study:

- Individuals with a diagnosis of any cerebellar disorder, aged 18 and older

Participation will involve:

- Completing 2 brief online forms and our neuropsychiatric questionnaire (up to 15mins) on one occasion

Participation is completely online and can be undertaken at the time and location of your convenience. Participation in this study is completely voluntary and you can stop at any time.

Follow the link below to complete the study:
